

PUBLIC NOTICE: MUNICIPAL DROUGHT RESPONSE

Water Distribution Program:

Given the recent rainfall and the decline in resident participation, the water distribution program will conclude once the remaining stock has been distributed. The public will be notified when the stock has been fully distributed.

Well Water Testing:

Residents are reminded that well water testing is especially important at this time and should be completed annually. Testing kits are available at the Municipal Office (8296 Hwy 7, Sherbrooke, NS). For more information about well water testing and maintenance, please visit:

<https://novascotia.ca/nse/water/docs/wellwaterbookletEnglish.pdf>

SMECA Shower Facility:

The SMECA Shower Facility will remain available for residents who require shower access, following the existing key fob deposit protocol. For questions about the key fob process or if the deposit presents a difficulty, please contact Mallory Tibbo at mallory.fraser@saint-marys.ca.

Thank you for your ongoing support throughout the drought response. The Committee remains committed to addressing future challenges and appreciates the valuable lessons learned over the past three months.
