

Open House Sessions for Wind Farm 3 as Part of the You're Invited! **Guysborough Wind Projects**

EverWind invites you to join us at one of our upcoming open house information sessions to learn more about Wind Farm 3 as part of the Guysborough Wind Projects. Wind Farm 3 involves up to 107 proposed wind turbines producing up to 856MW of renewable electricity, located in the Municipality of the District of Guysborough and the Municipality of the District of St. Mary's, near the communities of Country Harbour, Stormont, Port Bickerton, Port Hilford, Indian Harbour Lake, and Melrose.

These informal drop-in sessions, featuring poster boards, are an opportunity to meet the team, review early project information, ask questions, and share your feedback in an open and collaborative setting. Community input is an important part of the planning process, and we welcome your participation.
